Trends in Lucas County Home Lending: 2018–2022

10 Things to Know

By Matt Klesta, Senior Policy Analyst

Introduction

This series of chartbooks examines home mortgages and refinances from 2018 through 2022 for seven large counties in Kentucky, Ohio, and Pennsylvania:

- Allegheny County, Pennsylvania (Pittsburgh); Cuyahoga County, Ohio (Cleveland); Fayette County, Kentucky (Lexington); Franklin County, Ohio (Columbus); Hamilton County, Ohio (Cincinnati); Lucas County, Ohio (Toledo); and Montgomery County, Ohio (Dayton)

These charts are derived from the Home Mortgage Disclosure Act (HMDA) data set. Signed into law in 1975 by President Ford, the HMDA requires most financial institutions to disclose information on their mortgage lending. Annually, this information creates a publicly accessible data set that includes millions of records and covers about 90 percent of mortgage lending in the United States (Gerardi, Willen, and Zhang, 2020). More information on the HMDA can be found in this summary: *What is HMDA and why is it important?*

Notes
- Home purchases and refinances refer to first-lien, owner-occupied, one- to four-family units.
- This analysis only includes home purchases for which the borrower took out a mortgage loan.
- Low- and moderate-income (LMI) is defined as less than 80 percent of the Metropolitan Statistical Area's estimated median family income, while middle- and upper-income (MUI) is defined as greater than or equal to 80 percent.
- This analysis compares Black (non-Hispanic) and white (non-Hispanic) applications, which make up the majority of home purchase and refinance applications in the Fourth District's largest counties (79 percent in 2022).

Lending environment at the time

From 2018 through 2019, the mortgage lending environment was functioning in a relatively normal way. However, since then, several events have greatly impacted it: the COVID-19 pandemic and interest rates hitting a record low, followed by a rise.

By the end of 2020, the average interest rate for 30-year, fixed-rate mortgages reached 2.65 percent. That is the lowest rate recorded, with data going back to 1971 (Freddie Mac, 2022). The result was a surge in refinances and a general increase in home purchases (Newton and Vickery, 2022). Along with low interest rates, millennials, currently the largest adult population in the United States, were entering their peak homebuying years as the COVID-19 pandemic was causing people to rethink their housing situations (Friedman, 2020). Stimulus checks, student loan forbearance, and less spending on travel and entertainment during the COVID-19 lockdowns allowed many households to save for down payments (Friedman, 2021). However, decades of underbuilding combined with homeowners' moving less frequently and living in the same homes longer contributed to low inventory (Khater, Kiefer, and Yanamandra, 2021; Friedman, 2021).

Things began to shift again in 2022, as interest rates doubled during the year, which had never happened before (Freddie Mac, 2022). This increased the cost to borrow, causing mortgage lending activity, particularly refinances, to decline. This decrease was most noticeable for LMI households, which saw the greatest declines in home purchases from 2021 through 2022 (Choi and Walsh, 2023). At the same time, existing homeowners were experiencing the "lock-in effect." This refers to homeowners with low-interest-rate mortgages who are reluctant to sell in a high-interest-rate environment and potentially incur higher housing costs (Boesel, 2022).

1. Home mortgage applications decreased for most race and income groups in 2022, particularly for LMI households

## Home mortgage application rate by race and income in Lucas County
Black households applied for home mortgages (blue lines) at lower rates than white households (green lines) over the entire five-year period, but the gap narrowed in 2022. LMI households (solid lines) generally saw larger declines in application rates in 2022, with total applications declining by 23 percent for Black LMI households and by 27 percent for white LMI households.

Note: Calculated as applications by race per 1,000 owner-occupied units by race

2. Across-the-board declines in home purchase originations occurred in 2022 and were greatest for LMI borrowers

Percent change in home mortgage originations by race and income in Lucas County

Large increases in home purchase originations for Black MUI borrowers in 2020 (dashed blue line) and for Black LMI borrowers in 2021 (solid blue line) were followed by across-the-board declines for all race and income groups in 2022. These declines were greatest for LMI borrowers (solid lines).
Increases in Black home purchases led to a rising Black homeownership rate in Lucas County, which reached 39 percent in 2022 (up 4 percentage points from 2018). The white homeownership rate increased by 3 percentage points during the same period. However, the gap between Black and white homeownership rates remained wide at 32 percentage points.

3. Median loan amounts increased faster than median incomes

Median loan amount index for Lucas County

Legend: Black, LMI — Black, MUI — White, LMI — White, MUI
Median income index for Lucas County

Legend: Black, LMI — Black, MUI — White, LMI — White, MUI

From 2018 through 2021, median loan amounts in Lucas County increased, while in 2022, they leveled out or even declined slightly. However, median incomes increased markedly slower and even declined for some groups from 2018 through 2022.

Note: Median loan amounts and incomes in 2022 adjusted US dollars.

4. Shares of debt-to-income ratios that were greater than 36 percent increased for all borrower groups

Share of home purchase applications with DTIs greater than 36 percent in Lucas County

Legend: Black, LMI — Black, MUI — White, LMI — White, MUI
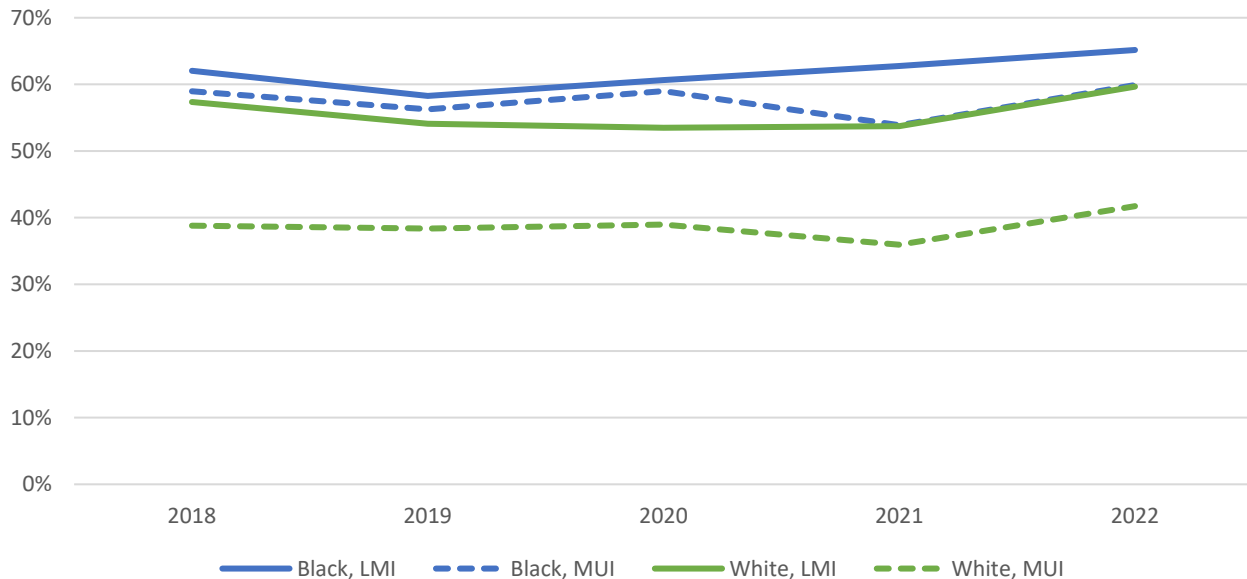

A general rule of thumb is that banks prefer a debt-to-income (DTI) ratio of 36 percent or less to signal a healthy amount of income. Since 2020, the share of home purchase applicants in Lucas County with a DTI of greater than 36 percent has been increasing across all race and income groups. These increases have been greatest for LMI applicants (solid lines).

5. Since 2021, home purchasers have become increasingly cost-burdened

Monthly housing costs as share of income for Lucas County

Legend: Black, LMI (solid blue) — Black, MUI (dashed blue) — White, LMI (solid green) — White, MUI (dashed green)

Since 2021, the median borrower across all race and income groups in Lucas County has seen an increase in the share of income spent on mortgage payments, real estate taxes, homeowners' insurance, and utilities. This increase has been largest for LMI borrowers (solid lines). Black LMI borrowers have seen an increase of 3.2 percentage points from 2020 through 2022, while white LMI borrowers have seen an increase of 3.6 percentage points. In 2022, shares for white LMI and white MUI borrowers exceeded 2018 levels.

Note: Cost-burden is the sum of the borrower's monthly mortgage payment (computed using the reported loan amount, interest rate, and loan term) and estimated taxes, insurance, and utility payments (estimated as a fraction of the property value using census microdata), divided by the borrower's stated income.

6. Home purchase denial rates were greatest for Black LMI borrowers in 2022

United States

Lucas County

Legend: Black, LMI — Black, MUI --- White, LMI — White, MUI ---
In Lucas County, home purchase denial rates for Black LMI applicants (solid blue line) have experienced a sharp increase of 4.9 percentage points since 2021, while those for other race and income groups have been relatively unchanged. The gap between Black and white denial rates remains stubbornly wide, averaging 10 percentage points for both LMI applicants (solid lines) and MUI applicants (dashed lines) from 2018 through 2022. In fact, during that same period, denial rates for Black MUI applicants (dashed blue line) were greater than for white LMI applicants (solid green line).

Source: HMDA data

7. In 2022, DTI was a more common denial reason for LMI home purchase applicants, while credit history was more common for Black applicants

## Top home purchase denial reasons by race and income group in Lucas County, 2022
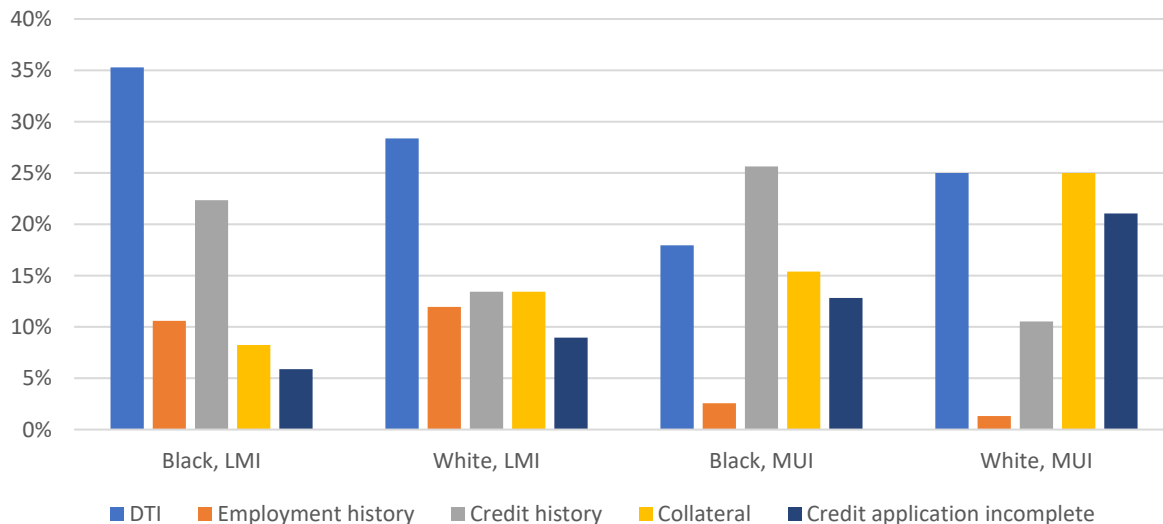

In 2022, DTI was a more prevalent denial reason for LMI home purchase applicants, while credit history was more common for Black applicants. Collateral, which refers to a home's appraised value being too low to support the required loan-to-value ratio, was more common for white MUI applicants. Notably, incomplete credit applications were particularly high for white MUI applicants.

Notes: Top denial reasons differ by race and income group. There are eight possible denial reasons (DTI ratio, employment history, credit history, insufficient cash for the down payment and closing costs, unverifiable information, credit application incomplete, mortgage insurance denied, and other).

8. Rising interest rates led to a dramatic decrease in refinances across all race and income groups

Percent change in refinances by race and income group in Lucas County

Refinances in Lucas County increased from 2018 through 2021, particularly for white MUI homeowners in 2020 and for Black LMI homeowners in 2021. Refinances across all race and income groups declined precipitously in 2022 as interest rates rose.

9. Refinance denial rates increased for all race and income groups in 2022

United States

Lucas County

Legend: Black, LMI (solid blue) — Black, MUI (dashed blue) — White, LMI (solid green) — White, MUI (dashed green)

Refinance denial rates in Lucas County increased in 2022 but remained below 2018 rates for all race and income groups. While the gap between Black and white denial rates has narrowed, it remained stubbornly wide in 2022: 20 percentage points for LMI applicants (solid lines) and 22 percentage points for MUI applicants (dashed lines). In fact, denial rates for Black MUI applicants (dashed blue line) were greater than for white LMI applicants (solid green line) from 2018 through 2022.

10. In 2022, credit history was the top refinance denial reason for all groups except white LMI applicants

Top denial reasons for each race and income group in Lucas County, 2022
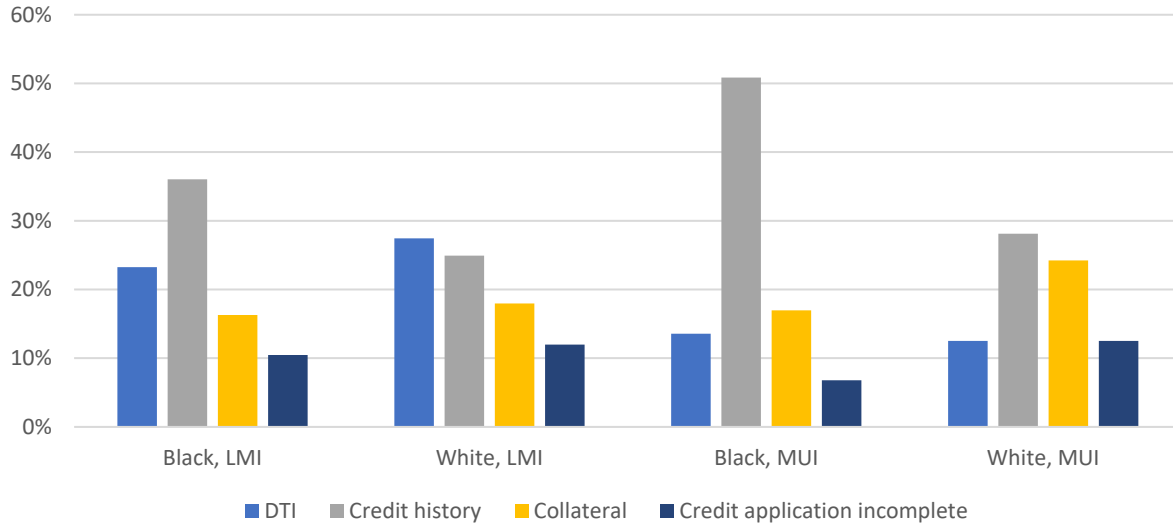

In 2022, credit history was the top refinance denial reason for all groups except white LMI applicants and was particularly high for Black MUI applicants. DTI was higher for LMI applicants. Collateral refers to a home's appraised value being too low to support the required loan-to-value ratio.

Notes: Top denial reasons differ by race and income group. There are eight possible denial reasons (DTI ratio, employment history, credit history, insufficient cash for the down payment and closing costs, unverifiable information, credit application incomplete, mortgage insurance denied, and other).
