A Wake-Up Call for Charlotte-Mecklenburg

Land of opportunity? Not by a long shot

Charlotte is nation's worst big city
for climbing out of poverty

The Charlotte Observer

Over the last several decades, Charlotte-Mecklenburg has transformed from a small southern town to one of the country's largest and most dynamic communities. We continue to attract people—nearly 50 a day— who move here to take advantage of our strong business climate, favorable weather and

geographic location, and our reputation as a great place to live and raise a family.

Accolades from the outside regularly tell us how tall we stand among other communities. As recently as February 7, 2017, U.S. News and World Report ranked us as the 14th best place to live in the country.ⁱ

Yet, in 2013 when the headline broke about the Harvard University/UC Berkeley study that ranked Charlotte-Mecklenburg 50th out of 50 in upward mobilityⁱⁱ for children born into our lowest income quintile, many in our community responded with disbelief. **How, on the one hand, can we be such a vital and opportunity-rich community, and on the other, be ranked dead last in the odds that our lowest income children and youth will be able to move up the economic ladder as they become adults?**
