Breaking the link between unhealthy homes and unhealthy families
Our Impact in Maryland

Lead poisoning cases in Maryland continue to drop

By The Associated Press
October 25, 2017 2:26 pm

BALTIMORE (AP) — State environmental officials say the number of childhood lead poisoning cases in Maryland has dropped to its lowest level since testing was implemented nearly 25 years ago.

98% reduction in childhood lead poisoning – equivalent of 65,000 children according to threshold of 5 ug/dL

$44.5 billion in prevented losses of lifetime earnings put back into the Maryland economy (Duke University)
The Burden of Sub-Standard Housing
Unaffordable, inefficient, and unhealthy

- 30M families live in unhealthy homes
  - Homes with environmental hazards are making their residents sick

- 14.4M missed days of school each year
  - Asthma is the top reason students miss school

- 14.2M missed days of work each year
  - Collateral burden of sick children is missed days of work for parents and caretakers

Over $155B in economic costs related to these hazards

- $81B+ spent on asthma
- $31B+ spent on slip & fall injuries
- $43B+ spent on lead poisoning

Low income families spend 20% of monthly income on energy costs
VS.
3.5% in other households

Becoming More Obvious: The impacts of sub-standard housing

**Health Impacts**
- Environmental hazards
  - lead paint
  - asthma triggers
- Mental health conditions
  - Stress
  - anxiety
- Childhood stress
  - chronic health conditions

**Economic Impacts**
- Reduced productivity
- Lower job security
- Less access to benefits

**Education Impacts**
- Poor grade level performance
- Lower graduation rates
- Lost earning potential

**50% displacement rate** for households below poverty line, often due stress, inability to pay rent and bills, and poor quality or unsafe housing.
A Problem of Silos:
Access to valuable programs is not streamlined

Even federal programs have different eligibility criteria

Program: Criteria:
- HUD CDBG: 80% of AMI
- HUD Lead: 80% of AMI
- DOE WAP: 200% of FLP
- HHS LIHEAP: 125% of FLP
The GHHI Solution: Address the whole home

- Lead Hazard Reduction
- Asthma Trigger Control
- Fall/Injury Prevention
- Energy Efficiency
- Weatherization
- Housing Rehabilitation

Align services & funding

Braid relevant resources

Coordinate service delivery

- Single Intake System
- Comprehensive Assessment
- Coordinated Services
- Integrated Interventions
- Cross-Trained Workers
- Shared Data

Philanthropy

Federal/State/Local

Private Sector

Single Intake System
Comprehensive Assessment
Coordinated Services
Integrated Interventions
Cross-Trained Workers
Shared Data

Lead Hazard Reduction
Asthma Trigger Control
Fall/Injury Prevention
Energy Efficiency
Weatherization
Housing Rehabilitation
The Strategy in Action for Families: The Obianuka Family

Pre-Intervention Situation:
- Homeowner family of five with a daughter who had severe asthma; average of 1 asthma related hospitalizations and 5 ED visits per year
- Conditions - Lack of kitchen and bathroom venting causing high moisture levels, mouse infestation and dust mites, chipping lead paint hazards; Lack of adequate heat due to needed furnace boiler replacement

Costs: $16,035 – Asthma Specific Costs: $4,059

Partners: Baltimore City Community Development Block Grant, the Maryland Energy Administration, and the Weinberg Foundation

Results & Outcomes:
- Allergens and lead and safety hazards remediates; Home weatherized and boiler replaced;
- Daughter was not hospitalized nor did she go to the emergency room due to asthma episodes in the 12 months post-intervention
- Asthma symptom free days changed from 0 per month to 29 days per month
- Annual energy cost savings of $407
## The Strategy in Action for Cities: National Results

*Philadelphia research work done by Philadelphia Department of Health  
**Cleveland research work done by Environmental Health Watch and Dr. Dearborn, Case Western Reserve University Medical School/University Hospitals
Lesson Learned: Define the Business Case
Example: the case to fund early lead and asthma interventions

**Lead Poisoning Prevention**

**Impacts during childhood**
- 700% increase in school drop out rate
- 600% increase risk of juvenile delinquency

**Impacts in adulthood**
- Diminished earnings from lower IQ
- Higher likelihood of incarceration

$1 invested in preventive remediation

$7 - $221 return on investment

Increased lifetime earnings of $1,024,000 per child if lead poisoning prevented

**Environmental Control of Asthma**

Asthma results in $50.1B in annual medical costs
(40% of costs are tied to triggers in the home)

Cost of ER visit
$500-$1,000

Cost of hospitalization
$7,500-20,000

$1 invested in asthma interventions

$5.30 - $14 return on investment

Tapping into Innovative Healthcare Funding

- Medicaid, CHIP Waivers & State Plan Amendments
- Hospital Community Benefits
- Pay for Success
- MCOs and Value-based Payments
- Medicare Advantage Plans
- Administrative Resources
Leading Medicaid/CHIP Policy Innovations – Maryland Program

GHHI helped develop and secure CMS and State of Maryland Medicaid Funding Support for Housing and Health Services

- GHHI and the Maryland Department of Health created a Medicaid/CHIP program model for lead hazard reduction and asthma trigger reduction services to use CHIP funds preventively

**Maryland Example:** $14.4 million program utilizing Maryland CHIP funds in 2017-2019 for:

- In-home resident education for lead poisoning prevention and asthma
- Environmental assessment for lead hazards and asthma triggers in the home
- Lead hazard remediation and asthma trigger reduction (IPM, mold, dust mites) interventions
- GHHI providing program match funding
In Practice: GHHI-Amerigroup Partnership
Direct payment for services

Prevention services provided to reduce asthma episodes:

- GHHI provides “Tier 1” services, which include:
  - Asthma resident education home visits and phone calls
  - Home prevention supplies
  - Environmental assessment
  - Integrated pest management

Compensation:

- The Amerigroup health plan pays for each member who is enrolled in the program:
  - 75% paid after the first home visit
  - 25% paid after month 5 of enrollment (after the two additional home visits are conducted)
Breathe Easy East Baltimore

A multi-pronged, community-based approach to reducing the burden of pediatric asthma

A partnership between:
The Breathe Easy East Baltimore Model

The BEE Program conducts activities in three areas in order to serve 1,500 clients and achieve program goals.

**Asthma Control and Prevention**
- Medical Interventions
  - Directly-Observed Therapy
  - AIR Team
- Non-Medical Interventions
  - Housing Interventions (Tiers I, II, and III)
  - In-Home Education

**Community Engagement**
- Workforce Development
- Community Education

**Surveillance and Data Mapping**
- Population-based asthma surveillance
- High-risk asthma surveillance
- Housing surveillance
Residents of the Target Investment Zone will be trained to work on the housing intervention teams as:

- Contractors to address environmental asthma triggers
- Community health workers to address family education and support needs

Workforce Development interventions will:

- Help meet the immediate needs of families affected by asthma
- Provide skilled job opportunities to residents of the Target Investment Zone
- Develop a workforce to perpetuate BEE interventions beyond the pilot stage
Spurring Innovation in Public Housing: O’Donnell Heights Asthma Initiative

What: A $200,000 pilot project in collaboration with the Housing Authority of Baltimore City (HABC)

Goals: Recruit, hire and train 2 full-time resident Community Health Workers

Conduct healthy housing trainings and safe practices for:
- HABC maintenance personnel
- Resident Advisory Board
- O’Donnell Heights community residents

Conduct healthy homes interventions in 50 public housing units

Set model standards for environmental assessment, quality assurance and control in public housing for national replication

Establish a connection between clinics and public housing for housing interventions
Housing Upgrades to Benefit Seniors (HUBS) Model

1. Founding Organization
   - Organizes referral process, develops trainings for partners, and hosts leadership meetings

2. Leadership Team
   - Performs home remediation and installs fall prevention measures

3. HUBS
   - Provides referrals into HUBS, conducts individualized needs assessment and assists with service referral process

4. Evaluator
   - Currently evaluating cost savings and impact of program
Investing Hospital Community Benefit Dollars Upstream

• To maintain non-profit status, hospitals have to utilize resources for community benefit (traditionally used to cover loss for uninsured and underinsured patients)
• Every non-profit hospital has to do a community health needs assessment every 3 years
• Housing interventions are eligible community benefit activities

Pilot:
• Uninsured asthmatics who are frequent flyers
• Using community benefit and philanthropic resources to serve the patients
• Tracking the results: Do the patients’ utilization go down?
• Presence now expanding to other hospitals in their system, and Elevate is partnering with a local utility, ComEd
State-Level Impacts
Integrating Health, Energy, and Housing in New York

Goal
Build capacity for services throughout the state and design an integrated delivery model

Outcome
Reduce energy usage, asthma episodes, household injury and lead poisoning and related energy and medical costs

Approach
Evaluate the possibility of supporting energy, health and housing services through sustainable public and private funding.

Partners
NYSERDA, NYSDOH, NYHCR
State-Wide Partnerships
Integrating Health, Energy, and Housing in Connecticut
How does Pay for Success work?

1. Investors provide upfront capital to scale evidence-based services.
2. Intervention results in a social impact, often cost savings, that the back-end payer values.
3. Payer repays investors once outcomes are verified by an independent Evaluator.
Pay for Success in the context of Medicaid Managed Care

We have designed our projects to fit existing Medicaid regulations.

1. PFS funders
2. Certified Medicaid Provider
3. Improved outcomes and cost savings
4. Managed Care Organization
5. Non-Medicaid Service Providers (e.g. GHHI)

- Cash flow
- Cash flow contingent on cost savings

Value-based payment

Financing arrangement
GHHI’s national innovative financing portfolio

- Baltimore - Priority Partners MCO
- Buffalo - Oishei Children’s Hospital and IHA MCO
- Chattanooga - green|spaces and Erlanger Children’s hospital
- Chicago - Presence Health, Elevate Energy, & NextLevel MCO
- Cincinnati - People Working Cooperatively
- Connecticut Medicaid and CT Greenbank
- Grand Rapids - Priority Health MCO, Healthy Homes Coalition of West Michigan
- Houston - UnitedHealthcare & Baylor
- Houston - Community Health Choice MCO
- Indiana - Indiana Joint Asthma Coalition
- Iowa – Healthy Homes Des Moines
- Marin - Contra Costa Health Services & MCE
- Memphis - Le Bonheur Children’s Hospital & UnitedHealthcare, Amerigroup, and BlueCare
- Minneapolis - MN Energy Efficiency For All
- New York City - Affinity Health Plan, AIrNyc, & AEA
- New York City - LISc
- New York Medicaid and NYSERDA
- Oregon - Community Services Consortium
- Philadelphia - National Nursing Care Consortium
- Richmond City Health District
- Rhode Island - State Medicaid and Integra Accountable Entity
- San Antonio - SA Asthma Collaborative
- Salt Lake - University of Utah Health Plans and Salt Lake County
- Springfield - Health New England MCO, Baystate Health, Public Health Institute of Western Mass
- Worcester - UMass Memorial Hospital
