Cornelius Johnson
Research Analyst II
Research
Federal Reserve Bank of Cleveland
He/him/his

Cornelius Johnson is a research analyst in the Research Department at the Federal Reserve Bank of Cleveland. In his role, he conducts research on macroeconomic policy and banking and finance topics. His research interests include financial inclusion, cryptocurrencies, labor economics, and economic growth.

He also supports recruiting and outreach efforts with high school and university students to expose them to career paths in economics.

Cornelius joined the Cleveland Reserve Bank in May 2019 as an intern in the Research department. The following summer, he became a Research Analyst and joined the Bank full-time in June 2020.

Cornelius holds a BS in economics with a mathematics minor from the Ohio State University.
